UNIVERSITY OF LOUISIANA.

President of the University:

HON RANDELL HUNT, LL., D.

Administrators:

His Excellency SAMUEL D. McENERY, *Governor of Louisiana*,
Hon. EDWARD BERMUDEZ, *Chief Justice of Louisiana*,
Hon. W. J. BEHAN, *Mayor of New Orleans*, } *Ex-Officio.*

HON. J. H. KENNARD,	D. C. LABATT,
ALBERT BALDWIN,	T. L. MACON,
W. E. SEYMOUR,	J. B. LAFITTE,
E. F. LAVILLEBEUVE,	R. S. HOWARD,

Medical Faculty:

T. G. RICHARDSON, M. D.,
Professor of General and Clinical Surgery.

SAMUEL M. BEMISS, M. D.,
Professor of the Theory and Practice of Medicine and Clinical Medicine.

STANFORD E. CHAILLÉ, M. D.,
Professor of Physiology and Pathological Anatomy.

JOSEPH JONES, M. D.,
Professor of Chemistry and Clinical Medicine.

SAMUEL LOGAN, M. D.,
Professor of Anatomy and Clinical Surgery.

ERNEST S. LEWIS, M. D.,
Professor of General and Clinical Obstetrics and Diseases of Women and Children.

JOHN B. ELLIOTT, M. D.,
Professor of Materia Medica, Therapeutics and Hygiene.

Demonstrators of Anatomy:

ALBERT B. MILES, M. D.,

* * * * *

MEDICAL DEPARTMENT.

The next annual course of instruction in this Department, now in the fiftieth year of its existence, will begin on Monday, October 22d, 1883, and end on Saturday March 29th, 1884.* The first four weeks of the term will be devoted exclusively to Clinical Medicine, Surgery, Obstetrics and Gynecology in the wards and amphitheatre of the Charity Hospital; Practical Chemistry in the Chemical Laboratory, under the direction of the Professor; and Practical Anatomy in the spacious and well-ventilated Anatomical Rooms of the University.

The peculiar feature of the school is its unequalled hospital advantages, to which the faculty would direct the special attention of graduates of other schools, as well as students of medicine and surgery.

Clinical Instruction at the Charity Hospital.

It is universally admitted that without abundant anatomical and clinical material no medical school, however numerous or eloquent its professors, can possibly fit its pupils for practical professional life. It is scarcely necessary to state that it is only in large cities that such advantages can be procured; but it is of paramount importance that the opportunities there afforded should be properly utilized; that the students should be required, under the direction of the teacher, to examine patients for themselves, to keep records of cases, to note daily changes which may occur, and thus to acquaint themselves by personal observation with the progress and termination of diseases and accidents. The mere introduction of a patient into an amphitheatre, and the discussion of his case by the professor in the presence of a large class, is no substitute for bed-side instruction, such as is offered by the great Charity Hospital of New Orleans: and no reduction of lecture fees, not even their entire abolition, can possibly compensate for the lack of such opportunities. The free use of the wards of this noble institution, with its *seven hundred beds*, and an annual admission of *more than six thousand patients*, has been given by acts of the Legislature to the professors of the Medical Department of the University of Louisiana for the practical instruction of its students, not only in Medicine and Surgery, but also in Obstetrics and Gynecology. We hazard nothing, therefore, in stating that the facilities here afforded for *genuine* clinical teaching are unsurpassed by any medical college in the United States; and that they are somewhat appreciated is attested by the yearly increasing size of the classes.

All the professors are Attending Physicians or Surgeons of the hospital, and visit their wards daily, accompanied by the students, who are thus brought into immediate contact with the sick and wounded, and are taught, practically, auscultation and percussion, analysis of urine, the application of dressings, etc. Surgical operations are performed, lectures delivered upon selected cases, and *post-mortem* examinations made in the amphitheatre of the hospital.

*The attempt to prejudice students against New Orleans by the publication of unfavorable statements concerning the health of the city is unworthy of notice, except to inform any who may be ignorant of the fact that only two epidemics of Yellow Fever have occurred here in twenty years. During the forty-nine years of the existence of the institution, no student has died from this cause during lecture term. Indeed, we think it may be shown that the mortality among the students of the University, from all causes combined, is less than that of any other Medical College in the United States. In proof of this, we take pleasure in referring to the fact that only two deaths have taken place during term since 1872.

Special instruction is given to the candidates for graduation, who are, for this purpose, divided into classes, assigned to the respective professors in charge of the wards in the hospital, and required to keep records of cases under their care. The classes thus formed interchange courses, so as to enable the candidates to enjoy equal advantages. Thoroughly competent Chiefs of Clinic aid the Clinical Teachers in developing to its full extent this system of instruction. Students who are not candidates for graduation make the daily hospital rounds with any of the clinical teachers. The following professors and their respective Chiefs of Clinic will be on duty the ensuing session :

PROF. T. G. RICHARDSON, M.D.	{ F. W. PARHAM, M. D.	} Chiefs of Clinic.
" S. M. BEMISS, M. D.	{ F. H. BRICKELL, M. D.	
" JOSEPH JONES, M. D.	{ J. H. BEMISS, M. D.	
" SAMUEL LOGAN, M. D.	{ STANHOPE JONES, M. D.	
" ERNEST S. LEWIS, M. D.	{ P. B. M'CUTCHON, M. D.	
" JOHN B. ELLIOTT, M. D.	{ G. B. UNDERHILL, M. D.	
	{ E. G. MICTON, M. D.	
	{ RUDOLPH MATAS, M. D.	
	{ G. B. LAWRASON, M. D.	

The regular lectures at the Hospital, on Clinical Medicine by Professors Bemiss and Jones; on Surgery, by Professors Richardson and Logan; on Obstetrics and Diseases of Women and Children, by Professor Lewis; and on Pathological Anatomy, by Professor Chaillé, will be delivered in the amphitheatre, daily, from 10 to 12 o'clock, A. M.

Unusual opportunities are afforded for the study of Physical Diagnosis, Practical Surgery and Gynecology.

Post-mortem examinations are made in the presence of the class by the Professor of Pathological Anatomy.

Diseases of the Eye are taught in the eye-wards of the Hospital.

Order of Lectures. The programme will be so arranged that the lectures upon the elementary branches, Anatomy, Physiology, Materia Medica and Chemistry, will occupy a somewhat larger proportion of hours during the first ten weeks of the session than the practical studies, Practice of Medicine, Surgery, Obstetrics, Gynecology and Therapeutics. On this account it is very important that the students should enter promptly at the opening of the term.

Didactic Lectures.

Systematic didactic instruction in the various branches will be given daily, immediately after the Hospital clinics, in the central building of the University, situated on Common street, between Baronne and Dryades streets. The means for illustrating this course consists of models in wood, wax, plaster and *papier maché* of rare and beautiful workmanship, executed in London, Paris and Florence expressly for the University; a complete series of specimens in materia medica; surgical and obstetrical instruments and appliances; a large collection of natural anatomical preparations; specimens in morbid anatomy; and an entire set of chemical and philosophical apparatus.

The Faculty call special attention to the fact that the subject of Hygiene has been added to the regular curriculum of the school. One lecture a week will be delivered upon this important topic by Professor John B. Elliott, M. D., whose chair has been accordingly designated Materia Medica, Therapeutics and Hygiene. This course is obligatory upon students.

Requisites for Graduation.

- I.—The candidate must be of good moral character, and have attained the age of twenty-one years.
- II.—He must present evidence of having studied medicine for at least three years under the direction of a regular graduate or practitioner of medicine of good standing, including the time spent in attendance upon lectures.
- III.—He must have attended two complete courses of lectures and dissections in a generally recognized medical college, the last of which must have been in this institution.
- IV.—He must write a thesis on a medical subject, and present it to the Dean one month before the close of the session.
- V.—He must pass a satisfactory examination before the Faculty.
- VI.—He must have paid in full all college dues, including the graduation fee.
(Students who intend to present themselves for examination are advised to write their theses during the summer vacation.)

Terms.

For the tickets of all the Professors.....	\$ 140 00
For the ticket of Practical Anatomy	10 00
Matriculation.....	5 00
Graduation in Medicine and Surgery.....	30 00

It will be noticed that the fees of the Department remain the same as those of the leading medical schools of New York and Philadelphia. Considering the unusual opportunities offered for practical instruction, and the constant care and labor bestowed upon the pupils, the charges are reasonably low: and the Faculty therefore appeal to their professional brethren throughout the South and West to continue their support to an institution which does not seek to increase the size of its classes by pecuniary rivalry, but by offering a *full equivalent for its charges*.

Graduates of other respectable Schools are admitted to all the privileges of the Department upon payment of the matriculation and half-lecture fees. They cannot, however, obtain the diploma of the University without passing the regular examination, and paying the usual graduation fee.

Students who have attended and paid for two full courses of lectures, the last of which was in this institution, are entitled to attend thereafter without charge; and it is the earnest desire of the Faculty that they should avail themselves of this privilege, to the extent of at least one additional course, before applying for graduation. It is gratifying to be able to state that many members of the last class followed this advice, and their high standing at the final examinations more than compensated them for their prolonged attendance upon lectures.

As a still further inducement, the Faculty will hereafter permit students who have attended and paid for two courses of lectures, the last of which shall have been in this institution, examinations upon one or more of the elementary branches, namely: Anatomy, Physiology and Pathological Anatomy, Chemistry, Materia Medica, Therapeutics and Hygiene. These examinations, if successful, will not be repeated, but if the applicant should fail upon one or more of them, he will be granted a second trial upon these when he shall present himself for final examination.

Instruction in Pharmacy.

The Faculty call attention to the fact that this institution is also authorized to grant diplomas in Pharmacy. Students in this Department attend the lectures upon *Materia Medica*, Therapeutics and Chemistry, and receive practical instruction in the Chemical Laboratory. Attendance upon two such courses entitles them to appear as candidates for the degree of Master of Pharmacy, which is publicly conferred at the Annual Commencement by the President of the University, upon those who pass the examinations.

The fees for the lectures are forty dollars per session, and for graduation twenty dollars; but as the course is included in that of Medicine, students who graduate in the latter and wish to take the degree in Pharmacy also, pay in addition only the diploma fee.

Text Books.

The books mentioned below are recommended in preference to others; but recent editions of any standard works may be used in their stead.

SURGERY—Gross, Ashurst or Bryant.

PRACTICE OF MEDICINE—Reynolds, Flint or Bristowe.

PHYSIOLOGY—Foster, Dalton or Flint.

PATHOLOGICAL ANATOMY—Green, Delafield, Cornil and Ranvier or Orth.

OBSTETRICS—Leishman, Playfair or Lusk.

GYNECOLOGY—Barnes, Thomas or Emmet.

DISEASES OF CHILDREN—Smith or West.

CHEMISTRY—Fownes or Attfield.

ANATOMY—Gray, Wilson or Richardson.

MATERIA MEDICA AND THERAPEUTICS—Wood, Rabuteau, Bartholow or National Dispensatory.

HYGIENE—Wilson or Parkes.

Boarding and lodging may be obtained as low as twenty dollars per month.

The Administrators of the Charity Hospital elect annually by competitive examination in March, fourteen Resident Students, who are entitled to boarding and lodging in the institution free of charges.

T. G. RICHARDSON, M. D.,

NEW ORLEANS, May, 1883.

Dean of the Faculty.

Summary of Cases Treated in the Charity Hospital during the Year 1882.

The following table of cases treated in the Charity Hospital during the past year will give some idea of the great advantages possessed by the University for the practical study of Medicine and Surgery.

DISEASES.	NUMBER OF CASES.	DISEASES.	NUMBER OF CASES.
General Diseases.....	2,847	Diseases of Locomotory Organs.....	69
Diseases of Nervous System.....	316	" Skin.....	47
" Circulatory Apparatus..	192	Injuries.....	792
" Respiratory Organs.....	694	Parasitic Diseases and Poisons.....	120
" Digestive ".....	754	Diseases of Eye and Ear.....	23
" Genito-Urinary ".....	537	Pregnancy, etc.....	160

In addition to the cases admitted into the house, a large number of out-patients apply daily, and, by the courtesy of the House Surgeon and Assistant House Surgeon, are sent to the Professors in charge of wards for diagnosis, medical advice, and surgical operation.

SCHEDULE OF

DATE.	ANATOMY.	PHYSIOLOGY.	CHEMISTRY.
1st Week, beginning, Nov. 14th, 1881...	Introductory—Histology. Abdomen.	Introductory — Chemical and Histological composition of the Body.....	Physical Phenomena and Force. Physical Properties of Matter.
2d Week.....	Alimentary Canal	Normal Histology (continued). Histology of Tumors.....	Physical Properties (continued). Heat.....
3d "	Abdominal and Pelvic Viscera.	Digestion.....	Light.....
4th "	Male Genital Organs.....	Digestion (continued)..... Absorption.....	Electricity, Magnetism, Galvanism, etc.....
5th "	Region of Thorax: Heart..... Respiratory Apparatus.....	Absorption (continued)..... Saugification.....	INORGANIC C. Non-metalloids, Nomenclature, Affinity.....
6th "	Respiratory Apparatus (continued)..... Nervous Centres.....	The Blood.....	Metalloids, Physical and Chemical Properties of.....
7th "	Brain and Spinal Cord (continued)..... Organs of Special Senses.....	The Blood (continued)..... Circulation.....	Metalloids—Physiological, Pathological and Toxicological, Properties of.....
8th "	Organs of Special Senses (continued).....	Circulation (continued).....	Demonstrations with Non-metallic Elements and Compounds.....

15th "	Femoral Region..... Perineum.....	Functions of the Spinal Cord and Nerves.....	Alkaloids—
16th "	Muscles, Vessels and Nerves of Lower Extremity.....	Functions of the Brain.....	Proximate Principles of the Human Body.....
17th "	Muscles, Vessels and Nerves of Thorax and Upper Extremity	Functions of the Cranial Nerves	The Urine.....
18th "	Same (continued), Muscles, Vessels and Nerves of Head and Neck	Functions of Sympathetic System..... Special Senses.....	The Blood.....
19th "	Same (continued).....	Special Senses.....	Toxicological Experiments.....
		The demonstrations in Morbid Anatomy are made in the Amphitheatre of the Charity Hospital.	

DIDACTIC LECTURES.

MATERIA MEDICA, THERAPEUTICS AND HYGIENE.	PRACTICE OF MEDICINE.	SURGERY.	OBSTETRICS AND DISEASES OF WOMEN AND CHILDREN.
Introduction—Absorption ... Elimination	Introductory—Malarial Diseases....	Acute Inflammation—Phenomena, Causes and Treatment of.....	Introductory—Female Organs of Generation
Classification—Agents Influencing Tissue Formation—Increasing	Malarial Diseases (continued)	Treatment of Acute Inflammation, (continued)..... Chronic Inflammation.....	Ovulation, Menstruation, Conception, Development of Ovum
The Same—(continued).....	Laryngitis—Simple and Membranous	Local Effects of Inflammation	Decidua, Chorion, Placenta, etc..... Changes During, and Signs of Pregnancy....
Agents Influencing Tissue Formation—Diminishing..	Pneumonia	Tumors—Benign	Disorders of Menstruation
The Same (continued).....	Pulmonary Phthisis ...	Tumors—Malignant and Semi-Malignant	Abortion (continued), Duration of Pregnancy .. Molar Pregnancy.....
Agents Influencing Nervous Function—Increasing	Pulmonary Phthisis (continued)	INJURIES—Constitutional and Local Effects, Contusions, Wounds	Super and Extra Fœtation. Missed Labor. Spurious Pregnancy ..
The Same (continued)	Diphtheria, Dysentery...	Hemorrhage	Gravid Uterus, Palpation Pelvis
Agents Influencing Nervous Function—Diminishing....	Diarrhœa and Asiatic Cholera.....	Injuries of Arteries, Veins, and Nerves.....	Fœtal Head..... Labor
The Same (continued).....	Typhoid Fever	Injuries of Bones—Contusions and Fractures.....	Stages and Management of Labor -- Puerperal State
Agents Influencing Secretion and Excretion—Increasing	Eruptive Fevers.....	Fractures—(continued).....	Presentations — Vertex, Face, Pelvis
The Same (continued)	Eruptive Fevers (continued).....	Injuries of Joints — Contusions, Wounds, Dislocations	Presentations—Shoulder, Funis, Placenta.....
Agents Influencing Secretion and Excretion—Diminishing	Yellow Fever.....	Dislocations, (continued)....	Tedious Labor.....
Prophylaxis—In Place	Diseases of Circulatory Apparatus	Diseases of Bones and Joints	Same (continued), Post partum, Hemorrhage—Rupture of Uterus
Prophylaxis—In Person....	Same (continued).....	Erysipelas, Burns and Tetanus	Inversion of Uterus, Retained Placenta, Puerperal Mania.....
Antiseptics.....	DISEASES OF NERVOUS SYSTEM—Inflammatory	REGIONAL SURGERY—Head..	Eclampsia
Antiparasitics.....	Paralytic Diseases	Face; Nasal and Buccal ... Cavities. Throat.....	Same (continued), Phlegmasia Dolens
Agents Influencing Local Action—Increasing.....	Functional Diseases	Cervical Region	Induction of Labor
The Same (continued)	Principles and Practice of Medicine.....	Thorax and Abdomen	Obstetric Operations — Chloroform Prophylaxis.....
Agents Influencing Local Action—Diminishing	Same (continued).....	Pelvis	First Dentition—Convulsions, Cholera Infantum.....
As elsewhere stated, one lecture per week will be devoted to the subject of HYGIENE.	Most of the Diseases not mentioned above are demonstrated from day to day in the wards and amphitheatre of the Charity Hospital.	Diseases and Injuries of Genito-Urinary Organs, Syphilis and many other affections, not mentioned above, are demonstrated in the amphitheatre and wards of the Charity Hospital.	Zosterical Affections of Children
			Surgical Diseases of Women are taught in the wards and amphitheatre of the Charity Hospital.

Graduates of 1883.

At a public "Commencement" held March 29th, 1883, the degree of DOCTOR OF MEDICINE was conferred upon the following named graduates, seventy-three in number, by the HON. RANDELL HUNT, LL. D., President of the University. The annual address was delivered by the RIGHT REVEREND HUGH MILLER THOMPSON, D. D., and the valedictory by STANHOPE JONES, M. D., a member of the graduating class.

UNIVERSITY OF LOUISIANA.

LAW DEPARTMENT.

FACULTY.

HON. RANDELL HUNT, LL. D.,

Professor of Constitutional Law, Commercial Law and the Law of Evidence.

HON. JAMES B. EUSTIS.

Professor of Civil Law.

WILLIAM FRANCIS MELLEN,

Professor of Common Law and Equity Jurisprudence.

HENRY CARLETON MILLER,

Professor of Admiralty and International Law.

The Constitution of Louisiana of 1845, contained the provision: "An University shall be established in the City of New Orleans. It shall be composed of four faculties, to wit: one of Law, one of Medicine, one of the Natural Sciences, and one of Letters."

The Legislature in 1847 passed "An Act to establish in the City of New Orleans, the University of Louisiana." The Act has since been amended. The University is placed under the control of eleven Administrators. The Governor of the State, the Chief Justice of the Supreme Court, and the Mayor of the City of New Orleans are ex-officio Administrators. Other Administrators are appointed by the Governor, by and with the advice and consent of the Senate.

By the Constitution of 1852, 1864 and 1868 and the new Constitution of 1879, the University is formally recognized and maintained.

The Law Department was organized in 1847. The degree of Bachelor of Laws granted by the University authorizes the person upon whom it is conferred to practice law in this State. The graduates of the school constitute a large number of the most respectable practitioners of law in Louisiana.

The annual course of instruction in this Department will commence on Monday November 12, 1883, and terminate in the ensuing month of May.

The great fountain of the jurisprudence of Louisiana is the Roman Civil Law. While it is necessary to study here, as in other States of the Union, the Law of Nature and Nations; Admiralty and Maritime Law; the Common Law; Equity and Constitutional Law; it becomes absolutely requisite to add to these, the study of the Civil Law—from which the provisions of the Code of Louisiana are mainly borrowed.

Besides, the jurisprudence arising from the conflict of the laws of different States and Nations in their actual application to modern commerce and intercourse is here practically taught by cases daily arising in the common business of private persons.

The Supreme Court, the various Courts of the State, the Circuit Court and the District Courts of the United States, hold their sessions in New Orleans during the whole period of the course of lectures of this Department of the University. Thus from the actual administration of justice in these Courts, from the discussions at the bar, and the opinions of learned Judges—as well as from the lectures of the Professors of the Law Department in the University, students have an opportunity of becoming acquainted with the theory of foreign laws, as well as our own law, and of familiarizing themselves with the practice of the State and Federal Courts.

The Library of the State has been suitably arranged over the lecture room in the wing of the University buildings devoted to the Department of Law, corner of Common and Dryades streets. The Library consists of some twenty-six thousand volumes, and includes a highly valuable collection of foreign and American legal works, and of Law Reports. During term time it is open daily from 9 A. M., until 3 P. M., and from 4 P. M., until 6 P. M. The use of the books is secured to students free of charge, under the regulations established by the Secretary of State.

Instruction will be given at the school daily during term time by Lectures and Expositions, and examinations in connection with them. Lectures will be delivered by the four professors,

Students who desire further information will address the

DEAN OF THE FACULTY.

New Orleans, June 1, 1883.

ACADEMICAL DEPARTMENT.

Faculty and Instructors.

R. H. JESSE (Dean of the Faculty),
Professor of Latin, and English History and Literature.

J. L. CROSS,
Professor of Pure and Applied Mathematics.

BROWN AYRES, B. Sc.,
Professor of Physics, and Acting Prof. of Chemistry.

ROBERT SHARP, M. A., PH. D. (Leipzig),
Professor of Greek and the English Language.

J. H. DEILER (Royal Normal College of Munich),
Professor of German.

ALCEÉ FORTIER,
Professor of French.

L. C. REED, A. B., (Principal of High School),
Assistant Professor of English.

JOHN R. FICKLEN, B. Lit., (Assistant Principal.)
Assistant Professor of English.

GEORGE GESSNER, A. M.,
Assistant Professor of Greek.

JOHNSON ARMSTRONG,
Assistant Professor of Latin.

ARTHUR S. WHEELER,
Assistant Professor of Mathematics and Physics.

FRANKLIN J. GUSTINE, M. D.,
Instructor in Penmanship and Commercial Course.

CHAS. B. STAFFORD,
Librarian.

The Academical Department of the University of Louisiana closes a fifth session with a record of work well done in the past and a promise of liberal patronage in the future. To supply the space necessary to the rapidly growing needs of the Academical Department, the building formerly known as the Mechanics' Institute, adjoining the other University buildings, has been purchased. The funds for the purchase of this building having been donated by that noble philanthropist, Paul Tulane, of Princeton, New Jersey, the building is now called "TULANE HALL."

In the Academical Department there is no curriculum or prescribed course of study. The parent or guardian must choose, with the advice of the Faculty, the branches to be pursued by the student.

The schools at present organized are those of Latin, Greek, Mathematics (pure and applied) English Language, English History and Literature, Physics and Mechanics (including Astronomy), General, Industrial and Analytical Chemistry, French and German.

A Diploma is given in each school when the course taught in that school is completed to the satisfaction of the Faculty.

The Degrees of Bachelor of Literature, Bachelor of Arts, Bachelor of Science and Master of Arts are conferred on students who obtain Diplomas in different specified groups of schools.

The instruction is thorough, the object being to give the student a good knowledge of a few subjects, rather than a superficial idea of many. To prevent idleness, the number of schools attended must be at least three; to prevent superficial work, it is better that the number should not be greater than four.

The Fisk Free Library, which is in the University buildings and under the management of its Board of Administrators, is open and easily accessible to students. The library is well supplied with standard works, comprising in all about 7,000 volumes, and all the best English, American, French, and German Reviews and Magazines are regularly received.

When the Academical Department was organized, it was evident to the Administrators that they had to choose between two alternatives: either to lower the standard of admission to the Academical Department, or to organize a High School preparatory to it. They have chosen the latter course, and this High School has been in successful operation for four sessions. In it, boys are thoroughly prepared for the classes in the Academical Department proper.

During the session just closed, two hundred and twelve students have been in attendance on the courses of instruction of the Academical Department and High School.

The terms are \$50 a session (8½ months) in the Academical Department and \$45 in the High School. Board in approved boarding houses and private families can be had for \$20 per month.

For catalogues and further particulars, address

R. H. JESSE,
Dean of the Faculty.

TULANE HALL.
